

ALERT! This is going to be a big week for Energy Efficiency and Community Choice issues at the CPUC

Thursday April 8 the Commission is expected to approved Resolution E-4250 (pending since last September and revised twice) that would cancel the early opt-outs and prevent some of the worst anti-CCA marketing. **PG&E's misuse of EE and solar funds to induce Novato to stay out of Marin Energy Authority is specifically mentioned in the Resolution** (see pp. 12-13). You may view PG&E's efforts to bribe Novato in broad daylight in WEM's video at http://www.womensenergymatters.org/video/Marin/pgvideo_novatoDemocracy.htm

The public may attend the CPUC meeting and comment on the Resolution (item 3 on the agenda). Thurs. April 8th 505 Van Ness Ave. @ McAllister, San Francisco (kitty-korner from SF City Hall) Note: The meeting starts at 10 and public comment is first thing.

The Resolution states:

4. Electric utilities cannot offer to provide, or provide, any goods, services, or programs to a local government, or to the electricity customers within that jurisdiction, on the condition that the local government not participate in a CCA, or for the purpose of inducing the local government not to participate in a CCA. This restriction applies regardless of whether the goods, services, or programs are funded by ratepayers or shareholders. (This restriction also applies to any plan whereby the utility would pay someone else to provide such goods, services, or programs.)
